Elaine- In DEPs 7/15/16 letter – they included the comment below. Were plans/cross sections included in the most recent IRA Status Report you reviewed? Did you see the plans/cross section in the vicinity of MW-15 that BC included in Phase III Appendix A – I assume that's their half-ass response to this comment. Do you agree? Worth pushing on this again or leave it?

1. MassDEP discussed the need to provide updated plans/figures that depict view and cross-sectional views in the shallow overburden, deep overburden,

The LSP indicated a map view plan of the two areas proposed to be excavated provided a copy of these plans prior to the June 15, 2016 telephone conversation. The LSP indicated that these same plans/cross sectional views will be provided in the future. However, that the area in the vicinity of MW-15 is not going to be excavated as part of the Phase III Remedial Action Plan. That no such plan/figures were to be completed for the vicinity of MW-15.

MassDEP accepted this response. However, MassDEP is hereby requesting that the LSP provide map view and cross sections of contaminant distribution in the vicinity of the MW-15 area. This information will be included into the Phase III Remedial Action Plan to assist in the evaluation of the remedial action for this location.
